We would like to thank our wonderful sponsors and contributors for their support! This is a true non-profit community event and we couldn't achieve the type of success we have had without your support! Our mission remains to help educate our community about environmental issues, watersheds, products, businesses, community groups, and agencies in order to help us all live more sustainably and preserve our natural resources for generations to come. We also seek to create a network for open communication between government agencies, non-profits, businesses, educational organizations and members of our local communities to encourage productive dialogue to improve our entire region!
